Illness and Accidents

At DDA we will deal promptly and effectively with any illnesses or injuries that occur while children are in our care. We take all practical steps to keep staff and children safe from communicable diseases.

Parents/ Carers must notify DDA of any medical conditions and/or allergies that the child has prior to starting the club and this will be recorded on the Application Form.

We will record any accidents or illnesses, together with any treatment given, on an **Incident Record** or **Accident Record** sheet as appropriate, which the parent or carer will be asked to sign when they collect the child.

DDA cannot accept children who are ill. If any children are ill when they first arrive at the class we will immediately notify their parents or carers to come and collect them. Any children who have been ill should not return to DDA until they have fully recovered, or until after the minimum exclusion period has expired (see table at the end of this policy).

First aid

The Club's designated First Aider is Sofia Higham. The designated First Aider has a current first aid certificate. First aid training will be renewed every three years. To ensure that there is a qualified first aider present and available at all times when the class is running. We will take into account the number of children and layout of the premises to ensure that first aiders are able to respond quickly to any incident.

The location of the first aid box. The designated First Aider regularly checks the contents of the first aid box to ensure that they are up to date, appropriate for children and comply with the Health and Safety (First Aid) Regulations 1981.

Procedure for a minor injury or illness

The first aider at the session will decide upon the appropriate action to take if a child becomes ill or suffers a minor injury.

- If a child becomes ill during a session, the parent or carer will be asked to collect the child as soon as possible. The child will be kept comfortable and will be closely supervised while awaiting collection.
- If a child complains of illness which does not impair their overall wellbeing, the child will be monitored for the rest of the session and the parent or carer will be notified when the child is collected.
- If a child suffers a minor injury, first aid will be administered and the child will be monitored for the remainder of the session. If necessary, the child's parent will be asked to collect the child as soon as possible.

Procedure for a major injury or serious illness

In the event of a child becoming seriously ill or suffering a major injury, the first aider at the session will decide whether the child needs to go straight to hospital or whether it is safe to wait for their parent or carer to arrive.

- If the child needs to go straight to hospital, we will call an ambulance and a member of staff will go to the hospital with the child.

- We will contact the child’s parents or carers with all urgency, and if they are unavailable we will call the other emergency contacts that we have on file for the child.
- After a major incident, staff will review the events and consider whether any changes need to be made to DDA’s policies or procedures.
- We will notify HSE under RIDDOR in the case of a death or major injury on the premises (eg broken limb, amputation, dislocation, etc - see the HSE website for a full list of reportable injuries).

Communicable diseases and conditions

If a case of head lice is found at DDA, the child’s parents or carers will be discreetly informed when they collect the child. Other parents will be warned to check their own children for head lice, but care will be taken not to identify the child affected.

If an infectious or communicable disease is detected on the premises, we will inform parents and carers as soon as possible.

If there is an outbreak of a notifiable disease at DDA, we will inform the local health protection unit, HSE under RIDDOR (if appropriate).
